

An ISO 9001 & 14001 Co.

MEDICAL & HOSPITAL EQUIPMENT

MODEL NO.:- RAJAS-CT2-21

(Organic model (pulmonary, cardiac, venous, renal and nervous system))

Specification:-

Organic model (pulmonary, cardiac, venous, renal and nervous system)

The procedure correctly, as well as ongoing chest tube maintenance and pre-hospital chest trauma management. The simulator has a pressure-operated pneumothorax site and a site for surgical placement of a functional chest tube. Fluid color, volume, and viscosity can be controlled by the instructor. The manikin can be used with any commercially available closed-loop drainage unit. Pericardiocentesis can be performed in the left subxiphoid space and the fifth left intercostal space. Accurate needle placement will allow fluid removal from the simulated pericardium. Includes a fluid reservoir bag, foot pump, surgical skin pads, subcutaneous surgical pads, nurse training pads, pneumothorax pads, blood powder, hydroxyethylcellulose thickener, simulated pericardium, IV bag, and a hard case. Five-year warranty.

Comes with: Surgical skin pads

Subcutaneous surgical tampons,

Pneumothorax tampons,

Simulated pericardium,

Methylcellulose thickener,

Powdered blood, Cleaner,

This deluxe brain is cut in half with the head to allow for a detailed study of the brain's position within the skull. The human head is divided horizontally above the base of the skull. This deluxe brain model, poorly divided, shows the arteries in detail and the basilar artery is removable. The two halves can be disassembled into the frontal with the parietal lobes, temporal with the occipital lobes, half of the brainstem, and half of the cerebellum. Measures 6" x 6" x 9". Comes on a base.
