

MEDICAL & HOSPITAL EQUIPMENT

MODEL NO.:- RAJAS-CT5-01
(Complete Mother Nathalie)

Specification:-

The Mama Natalie simulator provides realistic and affordable training for childbirth management. Mama Natalie gives birth on the Neo Natalie newborn simulator. Together, these simulators provide realistic training for virtually all basic obstetric and neonatal emergency situations.

An easy-to-use birth simulator

Mama Natalie is a simulation tool that allows you to recreate normal or complex birth situations. It allows for strong interaction between learners and the mother during delivery. The simulator is held by straps on the instructor, who manually controls it and allows you to simulate:

Cervical dilation.

Fetal heart sounds.

The position and expulsion of the baby.

Complete or incomplete expulsion of the placenta.

The configuration of the uterus.

The intensity and volume of bleeding.

Urinary catheterization possible.

1 Placenta Complete, partial or incomplete expulsion of the placenta

2 Umbilical Cord Connected to the NeoNatalie simulator. Pulse palpable. Complications related to the umbilical cord.

3 Bladder Catheterization possible

4 Rectum Allows medication

5 Neonatal MamaNatalie® also gives birth to NeoNatalie, a newborn who is also very realistic. NeoNatalie provides education that meets global standards. It has a realistic size and appearance, as well as its weight and the feeling of grip when filled with water.

6 Blood tank 1.5L capacity. Valve to adjust bleeding intensity. Blood loss indicator.

7 Uterus Contains the child, placenta, and umbilical cord. Controllable uterine firmness, atonic and contracted shape.

Provide a prospectus or original documentation to verify the proposed technical specifications

Delivery will be made to the following sites DSF 2, Ouagadougou and 1 by DRS DRS center-south (Manga) DRS plateau-central (Ziniaré), DRS Center-north (KAYA), DRS EST (Fada) DRS CASCADES (Banfora) DRS north Ouahigouya), DRS CENTRE-EST (Tenkodogo), DRS Boucle du Mouhoun (Dédougou)
